

# Diagnostic Report

**2011 Land Rover LR4**

**Mileage:** 117,244

SALAK2D45BA559640

---

FIXD detected **4 issues** with your vehicle.

These issues indicate a **minor driving impact** and are not likely to cause damage to your vehicle immediately.

## Detected Issues

### **P0357** - Ignition Coil

- **Severity** - Moderate
- **Description** - Your Ignition Coil generates the electrical energy required to use your spark plugs. If these ignition coils are not working, your spark plugs may not work which would cause your engine to not run properly and may cause a misfire.
- **Consequences of Continued Driving** - Engine may hesitate, Increased vibrations, Harder to start

### **P0355** - Ignition Coil

- **Severity** - Moderate
- **Description** - Your Ignition Coil generates the electrical energy required to use your spark plugs. If these ignition coils are not working, your spark plugs may not work which would cause your engine to not run properly and may cause a misfire.
- **Consequences of Continued Driving** - Engine may hesitate, Increased vibrations, Harder to start

### **P0353** - Ignition Coil

- **Severity** - Moderate
- **Description** - Your Ignition Coil generates the electrical energy required to use your spark plugs. If these ignition coils are not working, your spark plugs may not work which would cause your engine to not run properly and may cause a misfire.

- **Consequences of Continued Driving** - Engine may hesitate, Increased vibrations, Harder to start

### **P0351** - Ignition Coil

- **Severity** - Moderate
- **Description** - Your Ignition Coil generates the electrical energy required to use your spark plugs. If these ignition coils are not working, your spark plugs may not work which would cause your engine to not run properly and may cause a misfire.
- **Consequences of Continued Driving** - Engine may hesitate, Increased vibrations, Harder to start
